BUCKLE UP!

- A SPECIAL CUSTOMER THANK YOU -

This year, we're adding a little extra competition to Night of Champions! As a thank you to the buyers who step up and invest in the BRC program, we'll be awarding **three custom Night of Champions trophy belt buckles** to the top 3 buyers of the sale.

But buying isn't the only way to win one! We're also awarding a custom **"Top Bidder" buckle** to the person who casts the greatest number of bids throughout the sale. You don't have to be the biggest buyer - we also appreciate those who stay in the game from the opening hours!

Four custom buckles. Four chances to take home a little piece of Night of Champions history. So find your favorites, get your mouse ready and don't be afraid to keep that BID button busy.

THANK YOU TO THESE TRUSTED INDUSTRY PARTNERS!

2021 International Grand Champion Female

Some opportunities are rare. This one borders on unheard of. BRC 805/8 is a former International Grand Champion Female, the 2021 International Champion Female, and quite literally one of the females who helped define what BRC would become. During her show career, 805/8 was the inspiration behind our phrase "The Modern Brahman" — a big, powerful, beautifully designed female who combined the look required to win at the highest level with the performance and function we believed the Brahman breed needed. Nearly a decade later, she has proven that philosophy far beyond the show ring.

Sells natural bred to the 2025 International Champion Bull, BRC Johnny Brahman 299 for an ECD of 4/15/2027, which backs up her calving interval by over 20 days. Sells with a registered bull calf at side: BRC WHISTLE STOP 794, born May 2026 and sired by BRC Geronimos Cadillac 230. This is a 3-N-1 lot.

SELLS WITH BULL CALF AT SIDE

**BRC UPTOWN GIRL 463
DAUGHTER OF 805/8**

805/8 is a large-framed, powerful female with tremendous substance and excellent carcass quality, and she has backed up her championship phenotype with serious production. She has an adjusted IMF% of 4.76 and a REA/CWT of 1.18. Her lifetime IVF history averages an impressive 45 oocytes and 7.1 embryos per aspiration. And while flushing has been a major part of her career, at BRC we believe our donors should still do what great cows are supposed to do: have natural calves. That is exactly why this approximately nine-year-old International Grand Champion sells as a 3-N-1: the cow, her calf at side, and bred back for another one.

Her production record speaks even louder. 805/8 is currently the #5 highest income-producing female in the BRC program, generating more than \$215,000 in progeny sales. Her proven offspring include BRC Uptown Girl 463, an extremely successful member of our current show string; BRC Mustang Sally 267, a many-time champion on the Florida junior show circuit. Her natural calf BRC Lady Wonder 101 sold for \$32,000; and another natural calf, BRC Empresario 217, was a former show bull and division champion at Dallas. Genetically, she combines Mr. V8 380/6 with Miss V8 775/6 — a pedigree that has already proven it can generate cattle with both value and banners.

You can buy embryos. You can buy daughters. You can buy cattle that are related to champions. But how often do you get the chance to buy the International Grand Champion herself? Especially one who's still in production, with a calf at side, another calf on the way, and more than \$215,000 worth of proof behind her?

BRC 805/8 isn't selling on what she might become. She's already done it. The only question left is what she can do for you.

BRC retains the right to have 805/8 be listed as "multiple owner" in ABBA's registry so that we can register future embryos from 805 that we have in our tank. We have 8 embryos stored in our tank.

BRC SMOKE SHOW 368
DAM OF LOT 2

JDH VERANO MANSO 292/8
SIRE OF LOT 2

Go ahead and stop right here. BRC Bright Eyes 755 is the kind that makes you stop flipping pages, and we have a feeling her picture is going to do plenty of talking. She is an absolute darling: extremely gentle, beautifully feminine, and moderate framed, yet absolutely loaded with shape. She is expressive over her top, stout through her hip, big boned and powerful, all wrapped up in a feminine, attractive package. In other words, she's impossible not to love.

Bright Eyes is the natural calf out of BRC Smoke Show 368, one of our most exciting young females. Smoke Show is a many-time champion herself, including Grand Champion Female at both 2025 Bos Indicus International Genotype + Phenotype Show and the TJBA State Show. And, she is the full sister to International Champion Bull BRC Johnny Brahman 299.

Her sire is a son of the internationally renowned JDH Massai Manso 608/6, Verano brings correctness, balance and muscle.

But here's where Bright Eyes really separates herself: her performance numbers are exceptional. She ranks in the top 1% of the Brahman breed for both Weaning Weight and Yearling Weight, while simultaneously ranking in the top 15% for Birth Weight and the top 15% for Milk. Finding low birth weight combined with that level of growth is difficult enough. Add milking performance into the same package, and those numbers become especially hard to come by.

Bright Eyes is young enough that her story is still completely unwritten, but she certainly isn't short on credentials to start with. She has the look, the disposition, the muscle, the performance and one heck of a cow family behind her. If your plans involve building the next generation of your program, take a long look at this one. We're proud of what's behind her, and even more excited about what could be ahead.

BRC ROCK ME MAMA 250
DAM OF LOT 3

BRC JOHNNY BRAHMAN 299
SIRE OF LOT 3

For years, some of the most exciting bulls at BRC have been offered through half-interest partnerships. Those partnerships gave breeders the opportunity to put a BRC herd sire to work in their own program while joining us in developing his future. But times change, and so does our program. We have not offered a half-interest bull since last year's Night of Champions, and opportunities like this will be very limited going forward.

Johnny B Good is one of the first sons of BRC Johnny Brahman 299, our 2025 Houston Grand Champion Bull and one of the young sires we believe represents an important direction for our program. Johnny Brahman combines the century-old Partin maternal bloodline, selected for generations for fertility, maternal ability and function, with some of our most proven show genetics. In Johnny B Good, we took that philosophy one step further by mating him to BRC Rock Me Mama 250, one of our most exciting young maternal females. At just 4½ years of age, 250 has already had three natural calves with an average calving interval of 360 days. Her first two natural calves sold for \$15,000 and \$12,500. She is moderate, powerful, feminine, structurally correct and beautifully uddered. That's exactly the kind of cow we want behind a herd sire.

Phenotypically, Johnny B Good gives us plenty of reasons to be excited. He is stout, masculine and expressive in his muscle while maintaining the balance and structural correctness we demand. More importantly, there is purpose behind the pedigree. This isn't simply champion stacked on champion. It is a deliberate combination of maternal strength, fertility and real-world functionality with the muscle, quality and eye appeal that have defined our Modern Brahman program. Should the new buyer wish to show, or be a junior, show rights are easily negotiable as part of the deal.

BRC AMOS MOSES
SIRE OF LOT 4

BRC APPLE BLOSSOM 249
DAM OF LOT 4

BRC Salvador 748 sells 100% full interest, and we think he offers a exciting combination of show-ring potential and long-term herd bull value, especially since he's a low birth weight bull (78 pounds). He is already started on the halter and has the look to make a very competitive show bull prospect: moderate framed, big bellied, heavy boned, masculine and exceptionally easy fleshing. He has that stout, powerful appearance we love in a Brahman bull, while still being put together in a package that is balanced and functional.

Salvador is sired by BRC Amos Moses 257. Amos combines two of our most proven bloodlines (160 x 21) and is consistently transmitting tremendous muscle, width, shape, breed character and structural quality. His first calves include champions BRC Your Gypsy 700 and BRC Grand River 690, and across the board, they are some of the stoutest, heaviest-muscled calves we have raised.

On the bottom side is BRC Apple Blossom 249, one of the young donors with a very bright future. A Captain daughter, Apple Blossom is feminine, sound, productive and beautifully uddered. And she didn't waste much time proving herself. Her first flush produced BRC Hit The Floor 745 and BRC Boots With The Fur 736, who sold for \$19,500 and \$19,000 respectively in our 2026 Spring Online Sale, with Hit The Floor already going on to earn banners for Ross Turner.

Perhaps the most exciting part of Salvador is that we're handing over the keys. There are no retained interests, no partnership decisions and no limitations on what his new owner can choose to do with him. Show him, use him, collect him, market him. His future belongs entirely to his new owner. With the early success behind both sides of this pedigree and the kind of bull we see developing in front of us, Salvador offers a lot of directions to go, and we're excited to see which one his new owner chooses.

4 Frozen Embryos BRC Feeling Good Again 323 x BRC Six Gun 328

Rare genetics are one thing. Access to them is another.

This package of four frozen embryos by 2026 Houston International Grand Champion BRC Six Gun 328 is being offered by the owners of Six Gun and BRC Feeling Good Again 323, Jackson Crew. With Six Gun semen unavailable on the public market and restrictions that typically prevent Six Gun embryos from being offered in the United States, this is a rare chance to access his genetics.

In his only U.S. public semen offering, Six Gun semen averaged \$5,500 per straw. Here, the mating is already made (so there's no semen required), adding another level of value to an opportunity that is difficult to duplicate.

And the mating is every bit as exciting as the opportunity. Six Gun is one of the most complete bulls we have raised at BRC, combining a moderate frame, tremendous rib and thickness, elite breed character and style with a genetic profile ranking in the top 10% for Weaning Weight, Yearling Weight, Total Maternal, Scrotal Circumference and Tenderness. On the maternal side is 2025 Cattleman's Congress Champion Junior Brahman Heifer BRC Feeling Good Again 323, a Breaker daughter out of BRC Boom Shaka Laka 21/8, who needs no introduction. Boom Shaka Laka is a two-time Houston Grand Champion, National Champion and Miss World.

Four embryos. Two championship pedigrees. A mating already made using semen that averaged \$5,500 per straw when it was publicly offered in the U.S. For a breeder looking for something genuinely difficult to put in the tank, this package offers access that simply isn't readily available.

Embryos are grade 1 embryos collected by TransOva. However, due to differences in technicians, recip quality, storage, handling and transfer conditions beyond the sellers' control, these frozen embryos are sold with no guarantee of pregnancy or conception. All / ET certificates will be released through BRC Ranch.

BRC HOOT OWL 248
SIRE OF LOT 6

The makings of a great Brahman cow are already easy to see in BRC She's A Hoot 819. She is fresh, feminine and upheaded, with a long-bodied design, good substance and the kind of attractive, balanced look that makes her easy to appreciate. She is complete, functional and full of quality, with a pedigree built to work.

She is sired by BRC Hoot Owl 248, the full brother to BRC Amos Moses 257 and a direct son of 160/8 and the legendary Boom Shaka Laka 21/8. Hoot Owl was a standout from the beginning, earning Reserve Calf Champion at San Antonio and placing second at Houston as a baby before an untimely injury ended his show career. He was a larger-framed, solid grey version of Amos Moses with tremendous breed character, size and power, and fortunately, we were still able to put him to work naturally in the BRC breeding program before he later joined the Wilson family as a herd sire at their ranch.

On the maternal side, 819 is out of Lady H Anna Manso 366/0, a Breaker daughter we purchased through a Heritage Cattle Company sale. We had used Breaker ourselves, liked the cattle he produced, and saw an opportunity to add another daughter of his to our cow herd. 366/0 is a 6-year-old cow that has raised 4 calves and bred back to go again. That gives She's A Hoot an interesting blend of BRC genetics on top with a proven Heritage influence underneath.

She's A Hoot is feminine, functional, well bred and the kind we believe can go home, grow up and make a good Brahman cow. That's the kind that can be a success in any and every program.

			Top 15%

JDH VERANO MANSO 292/8
SIRE OF LOT 2

BRC J NOBLE DAGGETT
MATERNAL HALF BROTHER TO LOT 7

Now this is some horsepower. BRC Sophie 848 is one of those females where the first impression is simply power. She is massive hiped, incredibly thick and loaded with shape through her hindquarter, with a big, bold middle and tremendous dimension from every angle. But what makes Sophie especially intriguing is that all of that power comes in a package that is still feminine, pretty and unmistakably female. There's a lot of cow here...and we mean that as a very good thing.

Sophie is sired by JDH Verano Manso 292/8, a Massai 608/6 son that we have grown to appreciate more with every calf crop. Verano has been a go-to choice for us on first-calf heifers, including show females, because of his disposition, correctness, balance and consistent quality. They come bloomy, good doing and with an impressive expression of muscle, and Sophie certainly didn't miss out on that part of the equation.

Her dam, Miss V8 620/8, brings another shot of power as a large-framed Noble daughter out of 902/7, a 380/6 daughter who was a division champion at Houston. 620/8 has also proven she can produce, including BRC J Noble Daggett, a class winner at both the AJBA All American and TJBA State Show for J.D. Sartwelle. When you look at Sophie, it's pretty easy to see where all that substance comes from.

If your breeding program could use more hip, more middle and more sheer dimension without giving up femininity and eye appeal, Sophie is your girl. She has the kind of power and look that's become the signature BRC style of Modern Brahman.

BRC SHUSH 478
MATERNAL HALF SISTER TO LOT 8

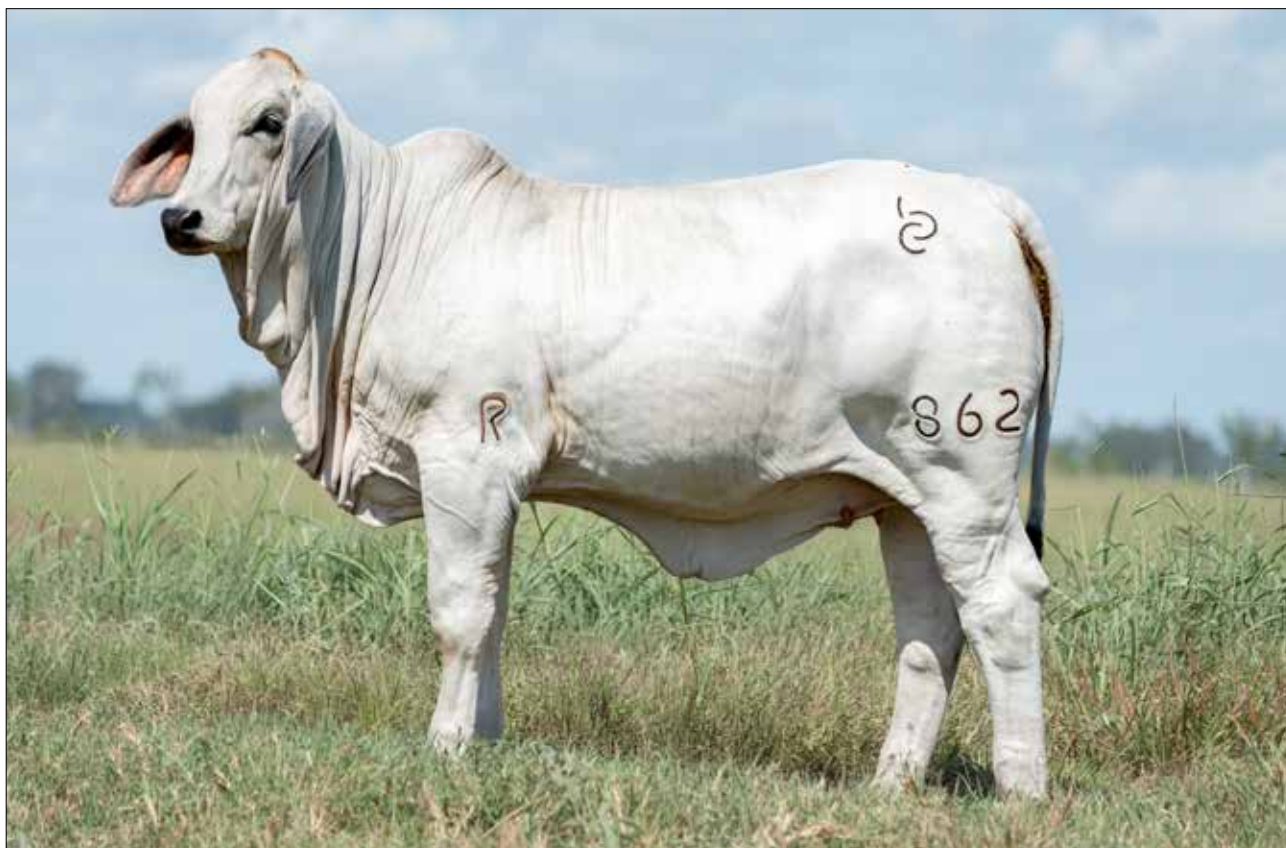

BRC ANNIE BANANIE 269
MATERNAL HALF SISTER TO LOT 8

BRC Euphoria 859 is a female we especially encourage you to watch on video, because that's where her length, balance, style and presence really come together. She is elegant and feminine, long bodied and level designed, with plenty of hip and an attractive, upheaded look. The more you study her, the more you appreciate how naturally all the pieces fit.

And this mating is about as predictable and proven as we can make it. Euphoria is sired by +BRC Dutton 376/8, the 2019 U.S. Reserve National Champion Bull. Dutton has sired champions in all over the world. We consider him one of the most influential and consistent sires we have produced. But perhaps what we value most about Dutton is what he has done through his daughters. International and National Champions are among them, and generation after generation, they have developed into moderate, feminine, sound and functional females.

Then there's Pearl. At 12 years of age, JDH Miss Pearl Manso 449/4 has built the kind of production record that takes years to earn. She is the dam of BRC herd sires Stockman 91 and Trail Boss 298, along with champion daughters BRC Annie Bananie 269 and BRC Shush 478. She remains sound, productive and beautifully uddered, with the fleshing ability, feet and longevity that have made her one of the most dependable females in Annie's program.

Dutton x Pearl puts proven female-making genetics on both sides of the pedigree, and Euphoria looks every bit the part. Length, elegance, balance and presence, backed by a sire known for his daughters and a dam who has proven herself over and over again. We believe this one has all the pieces to become the kind of Brahman female you'll be proud to own for a long time.

**BRC SIX GUN 328
SIRE OF LOT 9**

**BRC SWEETIE
DAM OF LOT 9**

BRC Drops of Jupiter 862 is a larger framed, complete young female who is strong topped, big middled and upheaded, with good breed character and adequate bone. She's sound, balanced and useful - backed by a lot of genetic predictability.

Drops of Jupiter is a daughter of 2026 Houston International Grand Champion BRC Six Gun 328, one of the most exciting young sires in the BRC program. And here's what makes that especially important: Six Gun semen is not available on the public market in the United States. If you want Six Gun genetics in your herd, buying a direct daughter like Drops of Jupiter is one of the very few ways to get them.

And the opportunity is becoming equally rare on the maternal side. Her dam, BRC Sweetie 486/8, is now deceased, meaning the number of direct daughters of this legendary female is forever limited. Sweetie was the 2018 National Champion and 2019 Houston Grand Champion Female, but her production record ultimately eclipsed even her own show career. She produced the 2026 Reserve International Champion Female, 2025 International Grand Champion Bull, 2023 International Grand Champion Female, and major champions including BRC Smoke Show 368 and BRC Gussied Up 372. Her progeny and genetics generated more than \$650,000 in lifetime sales.

Best of all, this isn't our first look at the Six Gun x Sweetie mating. A full sister from the fall calf crop was selected by Garrett Harvey and has already become a champion. Drops of Jupiter offers the same fresh mating and a direct daughter of one of the most proven producers in our program. For someone looking for a solid young female with an exceptional genetic foundation, there's plenty of reason to feel good about this one.

BRC JOHNNY BRAHMAN 299
SIRE OF LOT 10

BRC Alessandra 863 is exactly what we have come to expect from a Pearl daughter: pretty and refined, yet deep, functional and complete. She is a solid, balanced young female with "no holes." She's the kind that makes you appreciate the predictability of a proven cow family.

At 12 years of age, Pearl continues to impress us with her longevity, fleshing ability, sound feet and quality udder, but her production record is what really tells the story. She is the dam of BRC Stockman 91 and BRC Trail Boss 298, two herd bulls at BRC, along with many-time champion daughters BRC Annie Bananie 269, exhibited by Providence Ezell, and BRC Shush 478, a division champion at Houston this year for Layton Jefferson. Bulls, females, champions and replacements... Pearl produces "the right kind" over and over again.

Alessandra adds another very special piece through her sire, BRC Johnny Brahman 299, the 2025 Houston Grand Champion Bull. Johnny combines the maternal and functional Partin influence with one of BRC's most proven show-producing cow families through Sweetie. And when we talk about function, Johnny is proving it himself: he's a fertility powerhouse who breeds everything in sight. He's a bull we intend to use extensively in building the next generation of our program, and with Johnny Brahman semen not available on the public market in the United States, owning a direct daughter becomes an especially valuable way to access his genetics.

JDH MISS PEARL 449/4
DAM OF LOT 10

If you're trying to build a cow herd, there aren't many better than starting with a daughter of a cow that has proven she can produce, generation after generation. Alessandra gives you that Pearl predictability with the fresh genetics of an International Champion sire: an outstanding combination for a show heifer prospect that you ultimately want to turn into a cow.

JDH VERANO MANSO 292/8
SIRE OF LOT 11

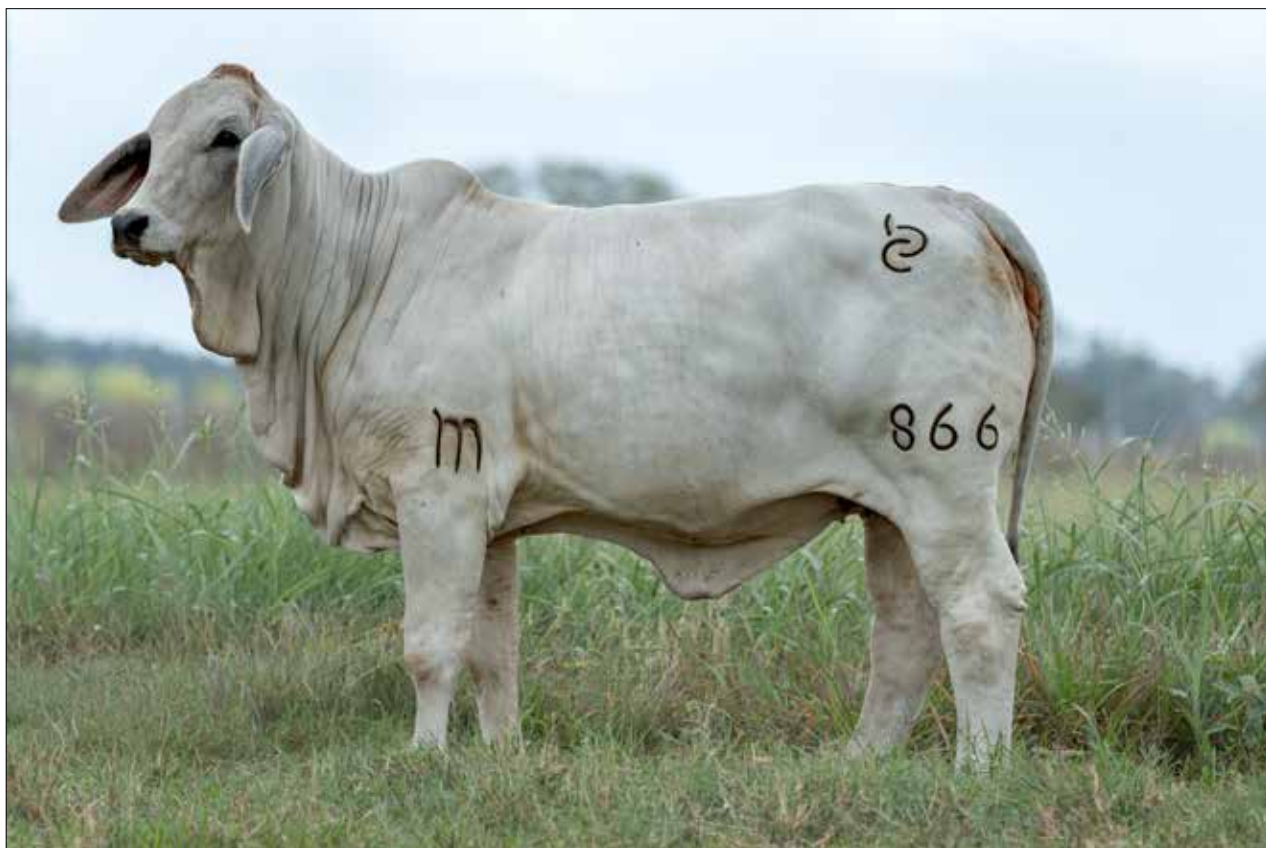

BRC BIG MAMOU 242
DAM OF LOT 11

Sometimes the bottom side of the pedigree is the reason you buy one, and BRC Delta Darling 864 is a perfect example. Her dam, BRC Big Mamou 242, is one of the most uniquely powerful females we have produced at BRC. She's a true power cow with tremendous bone, massive muscle and sheer substance that is difficult to put into words. Delta Darling comes from a flush that we believe will go down as one of our favorites in BRC history, and she offers a rare opportunity to get directly into this very fresh branch of our program.

Big Mamou herself was one of our "swing for the fence" matings: a 160/8 daughter out of 341, creating a closely line-bred combination of the 341 and Jennessa cow families. Remember, 160/8 is himself a grandson of 341, making the genetic concentration in Big Mamou very intentional and very interesting.

JDH Verano Manso 292/8 was an intentional complement to all that power. Quite honestly, we bought this bull for the sole reason of mating him to Big Mamou. A son of the internationally renowned Massai 608/6, Verano sires calves that are correct, balanced, and good doing. In Delta Darling, that mating resulted in a long-bodied, extended female with shape, power and a very interesting genetic package.

This is one we encourage you to study from the pedigree up. Delta Darling represents a mating we were extremely excited to make, centered around a young cow we believe offers something genuinely different. For breeders looking for fresh BRC genetics with a concentrated dose of power behind them, there is a lot to like here.

BRC SIX GUN 328
SIRE OF LOT 12

BRC LADY SUGAR 62
DAM OF LOT 12

BRC Shotta Sugar 866 is one of those females where everything just fits. She's long bodied, feminine, sound and exceptionally smooth made, with a functional design and an easy, balanced look from end to end. She has the length, correctness and overall completeness that make her easy to appreciate today and, more importantly, give her all the makings of a very useful Brahman cow.

Shotta Sugar is another exciting result from the BRC Lady Sugar 62 x BRC Six Gun 328 mating. As a show female herself, Sugar brought home all the big championship banners: Kickoff Classic, Heart of Texas, Cattleman's Congress, Fort Worth and San Antonio. Beyond the banners, what we have always appreciated about Sugar is that underneath the show-ring look was a female with excellent feet and legs, volume, dimension, plenty of substance and the structural integrity to go on and be a cow. As a 6-year old donor, she has had 4 natural calves.

Then we added 2026 Houston International Grand Champion BRC Six Gun 328, one of the bulls we believe can influence every facet of our program. Six Gun combines the phenotype we associate with The Modern Brahman: moderate frame, structure, rib, thickness and breed character with a genetic profile that ranks him in the top 10% for weaning weight, yearling weight, Total Maternal, Scrotal Circumference and tenderness. And with Six Gun semen unavailable on the public market in the United States, his direct daughters offer an increasingly important opportunity to access those genetics.

For the breeder who values function, balance and cattle that are simply built right, Shotta Sugar is one that is ready to make an impact in your herd.

SIRE OF LOT 13

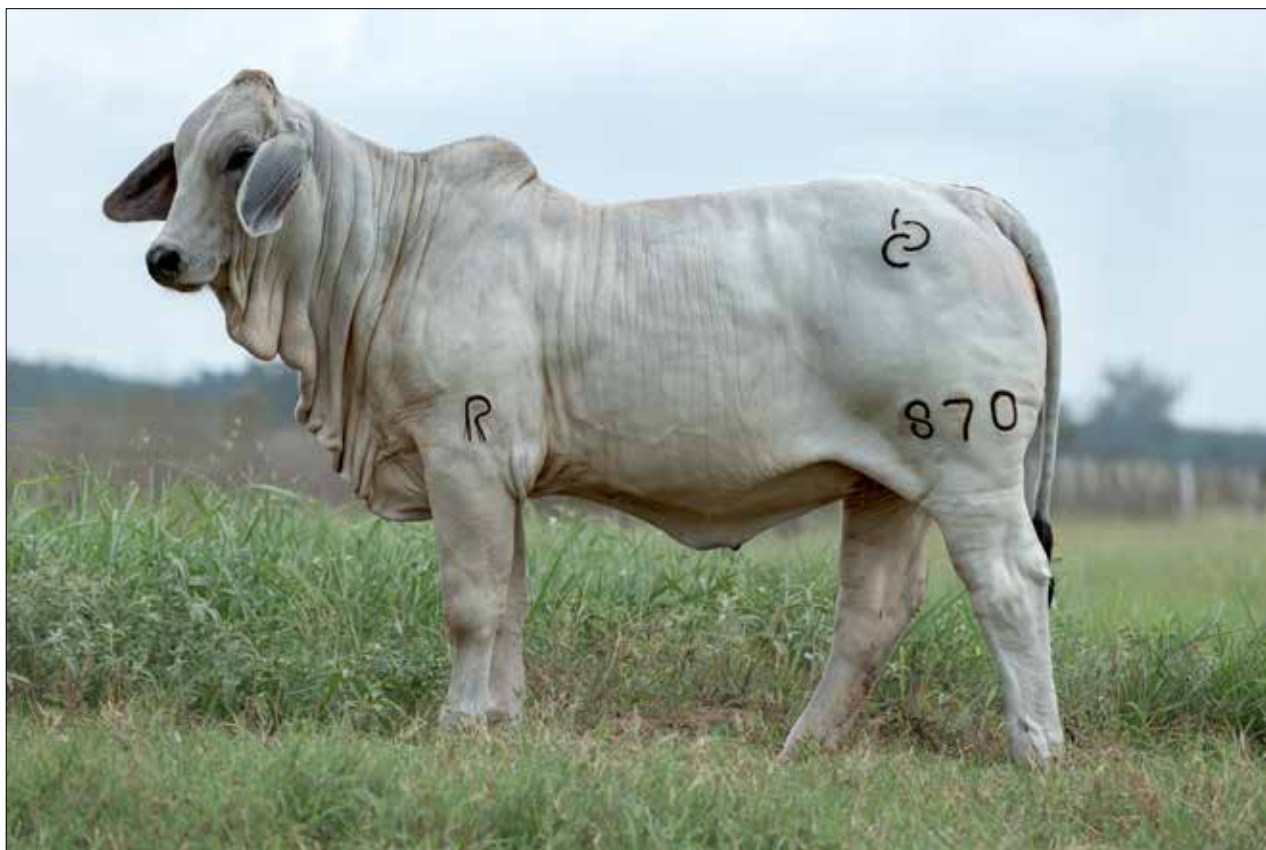

BRC BIG MAMOU 242
DAM OF LOT 13

Big Mamou is hammering them out, and BRC Eyes On You 867 may be one of our favorite examples yet. This female is soggy, deep and powerful, with tremendous body and rib, impressive length and so much shape coming out of her hip. She has that big, bold, good-doing look that makes you want to keep studying her, and she's remarkably complete when you put all the pieces together. This is a big-time female with a big-time future.

Her dam, BRC Big Mamou 242, is quite simply one of the most powerful females we have ever produced. She stands on possibly the heaviest bone we've ever put into a Brahman female and carries tremendous muscle, substance and dimension. Big Mamou was one of our "swing for the fence" matings: a 160/8 daughter out of 341, creating an intentional concentration of the 341 and Jennessa cow families since 160/8 himself is a grandson of 341.

And we've said it before: JDH Verano Manso 292/8 was a bull we bought specifically with Big Mamou in mind. A son of the internationally renowned Massai 608/6, Verano offered the moderation and smoothness we wanted to complement all of Big Mamou's sheer power.

Eyes On You is another reason we're getting increasingly excited about Big Mamou's future at BRC. The power is there. The body is there. The hip is definitely there. But so are the balance, length and completeness that turn all that substance into a really impressive female. This cow family is just getting started, and Eyes On You looks like one that can help write the next chapter.

BRC MONEY DON'T JIGGLE 240
SIRE OF LOT 14

BOOM SHAKA LAKA
DAM OF LOT 14

The last of a legacy? As of today, BRC Boomba 870 is the last daughter at BRC from Boom Shaka Laka 21/8, and the embryos we currently have remaining in our tank are reverse-sorted for males. She is powerful, stout and expressive, with tremendous bone, body, muscle shape and dimension, yet still carries the look and femininity you expect from this cow family.

We didn't choose her sire by accident. BRC Money Don't Jiggle 240 is one of the most outstanding young bulls we have ever raised and a full brother to BRC Me Again Margaret 254. He was also the 2025 Reserve Grand Champion Bull at Houston behind BRC Johnny Brahman 299. Sired by Noble and out of +103/8, Money combines tremendous muscle, body, structure and power with athleticism, soundness and eye appeal. As he has matured, he has only become more impressive, and we believed putting his power and design on Boom Shaka Laka could produce something pretty special. Boomba gives us plenty of reason to believe we were right.

Then there is Boom Shaka Laka. Two-time Houston International Grand Champion Female. National Champion. Miss Brahman World. Four BRC herd sires. Sons and daughters that have become champions, donors and influential breeding animals around the world. Her progeny and genetics have generated more than \$2 million in lifetime sales. Very few females, if any, have built a resume like that.

But eventually, every great cow's number of direct daughters becomes finite. Boomba 870 is a direct daughter, from one of the final opportunities we may ever have to offer, and she's by a young sire we believe represents an important part of where BRC is headed next. One legendary chapter of our program crossed with the next generation. For a female this good, with a story this difficult to duplicate, 870 is one we believe deserves a very serious look.

BRC YOUR GYPSY 700
MATERNAL HALF SISTER TO LOT 15

BRC COME ON EILEEN 75
DAM OF LOT 15

Here we go. BRC Waves and Wind 871 is one of the females that makes Night of Champions so memorable. She has the power, the hip, the bone and the sheer dimension to stop you in your tracks, but she combines it with the femininity, look and presence that make a great show heifer so much fun. She's bold, stout and expressive, yet still beautiful through her front end and unmistakably female. This one has the goods.

Her sire, BRC Money Don't Jiggle 240, is one of the most outstanding bulls we have ever raised at BRC and a full brother to BRC Me Again Margaret 254. A Noble son, Money brings tremendous muscle, structure, body and power while remaining athletic and exceptionally sound. He is the kind of bull that gets more impressive with maturity, and when you look at the hip, bone and power in Waves and Wind, you don't have to wonder where a lot of it came from.

Then we stacked all that power onto BRC Come On Eileen 75, and that's where this mating gets really fun. Eileen is a beautiful, feminine, long-bodied female with an old-school pedigree and a very modern production record. Her first flush alone is approaching \$100,000 in progeny value and produced BRC Your Gypsy 700, Grand Champion Female at Beaumont, TJBA, Washington County, and Sugar Classic plus the Reserve Grand Champion of the 2026 All American. Eileen proved right out of the gate that she can make the kind that compete, sell and go back to work.

Waves and Wind brings together two parents we believe are writing important chapters in the BRC program, and the result is exactly what we hoped this mating could produce. Power without sacrificing pretty. Substance without sacrificing femininity. Show-ring presence backed by a cow family built for life after the backdrop. If you're looking through this offering for one with that little extra bit of "wow," circle this one.

JDH VERANO MANSO 292/8
SIRE OF LOT 16

BRC LADY SUGAR 62
DAM OF LOT 16

Talk about loaded. BRC Sugar High 875 has power everywhere you look: a huge hip, tremendous thickness and shape, plenty of bone and an exceptionally complete design. Yet for all that power, she stays feminine, balanced and attractive, and the kind of overall quality that makes her hard to overlook. We think she has all the pieces to be a serious show heifer prospect.

And if you're wondering where all that power comes from, start with her mother. Sugar High 875 is the 4th natural calf out of the 6-year old BRC Lady Sugar 62. Sugar was the winningest junior Brahman show heifer of the 2021-2022 season for Kase Baca, collecting Grand Champions at the Kickoff Classic, Heart of Texas, Cattleman's Congress, Fort Worth and San Antonio. Sugar wasn't winning because she was simply pretty. She combined tremendous substance and power with structural integrity, femininity and balance. Those are many of the same qualities we're seeing today in Sugar High.

We mated Sugar to JDH Verano Manso 292/8, and we really like what he added to the equation. The Massai 608/6 son has consistently impressed us with the correctness, balance, muscle and eye appeal of his calves.

Great show heifers need more than one impressive angle, and that's what we like so much about Sugar High. She's powerful from behind, thick from every direction, feminine where she needs to be and remarkably complete when you put all the pieces together. Her mother knows a thing or two about winning, and from what we're seeing so far, the daughter certainly looks ready to give it a try.

+BRC DUTTON 376/8
SIRE OF LOT 17

MISS M2 809/1
DAM OF LOT 17

BRC Never Change 880 is a super flashy March heifer with the look and presence to immediately catch your eye. She is long bodied, beautifully extended and exceptionally dark pigmented, with the refined, complete, attractive look we love in a Brahman female.

And when you're talking about pretty, productive females, there may not be a more appropriate sire in our program than +BRC Dutton 376/8. The 2019 U.S. Reserve National Champion has gone on to become one of the most consistent sires we have ever produced, with progeny proving themselves around the world. His daughters have been especially impressive, including International and National Champions, and generation after generation they carry that recognizable Dutton look: moderate, feminine, sound, attractive and functional.

On the bottom side, Never Change is out of Miss M2 809/1, a daughter of BRC Captain 518/1 who was bred and raised by Wichita Ranch (home of Captain). Captain has built an impressive legacy of his own, with nearly 900 registered progeny in ABBA and daughters that include 2023 International Grand Champion Female BRC Lady Glitter Sparkle. With Captain semen sales approaching \$700,000, his influence has been widely sought after, and we especially appreciate what he has contributed through his females.

Dutton over a Captain daughter feels like a pretty safe place to start when the goal is making a Brahman cow. Never Change already has the pigment, femininity, length and eye appeal to get noticed today, with two sire lines behind her that have built their reputations producing the kind of females breeders want to keep. Pretty today. Cow potential tomorrow. That's a combination that never needs to change.

MR. V8 259/7
SIRE OF LOT 18

MISS V8 265/8
MATERNAL GRANDDAM OF LOT 18

If your goal is to buy a heifer that grows up and makes a beautiful Brahman cow, take a look on the Sunny Side. BRC Sunny Side 884 is a moderate, feminine and elegant March heifer with a stylish, strong top and clean underline. She is sound, solid and practical, and we see her as the kind of replacement female that should only get better as she matures.

Perhaps her biggest advantage is being a direct daughter of Mr. V8 259/7. For more than a decade, 259 has been one of the most consistently popular AI sires in the BRC lineup, and there's a reason: his daughters are worth their weight in gold. They are known as productive, functional females with excellent udders, and 259 has proven his ability to work across a wide variety of cattle and environments. His genetics have become increasingly difficult to access, making direct daughters like Sunny Side especially valuable.

Her dam, BRC Sunny Came Home 467, adds another proven female-producing influence as a daughter of BRC Captain 518/1. She traces maternally to 265/8, a beautifully dark-pigmented 380/6 daughter who has been a mainstay in Annie Cutrer's program. Put it together and Sunny Side carries generations of genetics that have been used with a very simple goal in mind: making good Brahman females.

If you're looking to add some length and elegance while keeping the maternal functionality we expect from a replacement female, Sunny Side offers a little different option in this sale. And with 259 behind her, we'd bet her best days are going to come when she has a calf at side.

+M2 BRC CAPTAIN 518/1
SIRE OF LOT 19

BRC SHUSH 478
FULL SISTER TO LOT 19

We've seen this movie before, and we really like how it ends. BRC Slo Mo 894 is a full sister to BRC Shush 478, and at this age, the resemblance between the two is remarkable. In fact, Slo Mo may bring even a little more power and hip to the equation. She has that beautiful maternal wedge we love: feminine and elegant through her front end, opening up into tremendous body, shape and power from behind. She's level topped, balanced, complete and the kind that looks like a female from every angle. Oh, and she's a March so she won't be competing against any of the January heifers offered in this sale!

This mating brings together two of the most proven producers in our program. Her sire, +M2 BRC Captain 518/1, built his reputation the old-fashioned way: through his progeny. With more than 800 registered offspring, Captain has sired global champions and a Houston Grand Champion and has become especially known for producing outstanding females.

Then there's Pearl. JDH Miss Pearl Manso 449/4 is simply one of those cows that never misses. At 12 years old, she remains sound, productive and beautifully uddered, and her production record includes BRC herd sires Stockman 91 and Trail Boss 298, along with champion daughters BRC Annie Bananie 269 and BRC Shush 478. When a cow can repeatedly produce herd bulls, show females and the kind of daughters you want back in the pasture, you pay attention.

And that's what makes Slo Mo so exciting to us. Captain x Pearl isn't a pedigree we're hoping might work... we know already know it does. Elegant enough to show. Powerful enough to impress. And bred like one you'll want to keep long after her show career is over.

BRC GERONIMOS CADILLAC 230
SIRE OF LOT 20

BRC LADY SUGAR 62
DAM OF LOT 20

BRC Sugar Sugar 898 is one of those females has consistently caught the eye of visitors at BRC with her completeness, balance and functional design. She's solid from end to end, sound, attractive and useful, and as the youngest heifer in this offering, we believe there's still a lot of development ahead of her. Give this one a little time and you're going to like her more and more.

Sugar Sugar is sired by BRC Geronimo's Cadillac 230, one of the exciting young sires out of our great donor Lupita 835/7. 230 went from a highly decorated show bull to a sire whose first calves are already producing high sellers and champions. He's a true 6-frame bull who combines moderation with tremendous muscle shape, performance, breed character and a functional build, with EPDs ranking in the top 5% for growth, maternal ability, tenderness and REA.

Her dam, BRC Lady Sugar 62, certainly knows something about making an impression herself. Sugar was Grand Champion at the Kickoff Classic, Heart of Texas, Cattleman's Congress, Fort Worth and San Antonio junior shows. More importantly for us today, underneath all those banners was a powerful, structurally sound female with excellent feet and legs, substance, femininity and the kind of design we believed could translate into a productive cow. She's currently 6 years old and is on her 4th natural calf, also while being one of our top young donors.

At just a March 30 baby, Sugar Sugar is the youngest heifer in the sale, and we believe her best days are well ahead of her. She's already complete, functional and impressive in person, with a champion-producing dam behind her and a sire whose daughters we're especially excited to see mature into cows. This is the kind of solid, useful female that we believe can quietly turn into a really good one.

Night of Champions has always been about the excitement of the offering, the stories behind the genetics, the anticipation of sale night, and celebrating the kind of cattle we all love.

This year, Night of Champions is coming to you.

We've moved the sale to an online format, giving Brahman enthusiasts everywhere a front row seat. So gather your family, grill a steak, login to the sale, pick your favorites and tune in from wherever you call home. The cattle are elite. The competition is real. And we have a feeling sale night will be very exciting.

And if you requested a printed Night of Champions catalog, keep an eye on your mailbox.

We're sending a little something extra your way to help celebrate the occasion.

So mark your calendar. Make your shortlist. And get ready. Your front row seat is waiting.

NIGHT OF
Champions
IS COMING TO YOU!

Night of Champions CUSTOMER SUCCESS

Anybody can make promises on sale night. We'd rather show you what happened after the gavel fell.

BRC cattle sold through past sales are winning for juniors, collecting banners in major open shows, generating six figures in semen sales, and building breeding programs across the United States and around the world.

Some sold for \$5,000. Some sold for \$70,000. Some went to established breeders. Others went to families buying their first BRC animal.

Different buyers. Different budgets. Different goals.

Same story: BRC cattle working for the people who invested in them.

BRC Dreams Unwind 678

Sold for \$10,000 in our 2025 Night of Champions. She has earned banner after banner for Kellin Boyce, including Supreme Champion Female at the 2026 West Texas Summer Classic.

BRC Shake Rattle Roll 703

Sold for \$18,000 in our 2025 Night of Champions to Brock Sartwelle as his "Senior Year" show heifer. She came out swinging: Grand Champion Brahman Heifer at the Arizona National, a class winner at the 2026 Houston Junior Show, and a class winner at the 2026 All American.

BRC Time Cast a Spell 674

Half-interest sold for \$26,000 in our 2025 Night of Champions to Wichita Ranch. Now two years old, she continues to impress and was recently named a class winner at the 2026 Washington County Show.

BRC Oh Sherrie 726

Sold for \$12,000 in our 2025 Night of Champions at just five months of age. This September, she was a class winner at the 2026 Washington County Open Show.

BRC Storm Coming 580

Half-interest sold for \$30,000 in our 2025 Night of Champions to Finley Bros. Cattle. Storm Coming has already been a three-time class winner and two-time division champion on the Fall 2026 show circuit.

BRC Playing With Fire 490

Sold for \$19,000 in our 2024 Night of Champions to Maaz Siddiqui. She went on to be named Grand Champion Female at the 2026 ABBA Winter Classic Stock Show.

BRC Johnny Brahman 299

Half-interest sold for \$38,250 in a past BRC sale. Johnny went on to win Grand Champion Bull at Houston and has generated more than \$70,000 in semen sales.

BRC Money Don't Jiggle 240

Half-interest sold for \$39,600 in a past BRC sale. He went on to be named Reserve Grand Champion at Houston and has generated more than \$125,000 in semen sales.

BRC Geronimos Cadillac 230

Half interest sold for \$22,100 in a past BRC sale. A consistent class winner throughout his show career, he has also generated more than \$100,000 in semen sales.

BRC Holiday Smile 395

Sold for just \$5,000 to Augustus Renk. This cow/calf pair went on to earn Augustus a first-place belt buckle at the 2025 TJBA State Show.

BRC Shak Your Boom Boom 464

Half-interest sold for \$30,000 in our 2025 Night of Champions. She has been in the winners' circle ever since, and we believe her best days are ahead of her.

BRC Mr. Boom Box 38

Half-interest sold for \$70,000 in a past BRC sale. Since then? More than \$330,000 in lifetime semen sales.

BRC Walking on Sunshine 358

Sold for \$20,000 in a past BRC sale to the Wilson family. She went on to win her division at the Houston Open Show during Eddie's senior year.

BRC Me Again Margaret 254

Half-interest sold for \$25,000 in a past Night of Champions. She went on to accomplish virtually everything we could have dreamed of in the show ring from 2023-2025 and is the dam of BRC Grand River 690.

BRC Shush 478

Sold for \$8,500 in our 2024 Night of Champions. She went on to win Division Champion at the 2026 Houston International Brahman Show, along with numerous other championships for Layton Jefferson.

BRC Hey Dude 118

Half-interest sold for \$34,000 in a past BRC sale. He went on to be crowned the 2022 National Champion Bull and has generated more than \$125,000 in lifetime semen sales.

RECEIPTS > RHETORIC.

The receipts are right here.

Different price points. Different families. Different parts of the country. Different definitions of success.

That matters to us, because our goal isn't simply to have a great sale.

We want you to be glad you bought the cattle.

At BRC, every breeder - big or small, right down the road or on the other side of the globe - has a seat at our table.

Come buy one you believe in. Then let's have some fun seeing what you can do with it.

30 HOUSTON CHAMPIONSHIPS. 10 YEARS. 1 RANCH.

Those numbers sound good on paper.
But what does it take to get there?

Hours and hours spent discussing matings. Picking apart our own cattle from every angle. Questioning what worked, what didn't, and what we could do differently - all in the relentless pursuit of making the next generation better.

The risks that looked a little crazy at the time.

The thousands of decisions made when nobody was watching.

Because champions aren't accidents. They're built in the details.

They're built by studying cattle. Knowing cattle. And being brutally honest about cattle.

Built by refusing to settle for good enough when you know better is possible.

By showing up again tomorrow. And the next day. And the next.

We've been blessed beyond anything we could have planned for our family.

God has opened doors we couldn't have opened. Put people in our lives we couldn't have found on our own. And entrusted us with opportunities we never could have imagined when this journey began.

But we've tried our best to meet those blessings with work.

Relentless work.

Not because winning is everything.
But because excellence matters.

Because when Brandon puts that BRC on one, we want it to mean something.

We want these cattle to be beautiful enough to win. Functional enough to work. Predictable enough to build around.

And valuable enough to make a difference for the person who owns them next.

That's why the cattle in this catalog aren't simply lots in a sale.

They're years of decisions.
Generations of genetics.
And pieces of a program we've spent our lives building.

Some will sell for more than others.

Some will go to legendary cattlemen with ranches known around the world.

Some may go home with a kid and a family who saved for months to buy the one they wanted.

We love that.

Because a championship mindset doesn't belong to one kind of person.

It doesn't care how big your ranch is.
How much money you have.
Or how long you've been in business.

It starts with believing you can build something and being willing to put in the work to do it.

Maybe your championship is Houston.
Maybe it's your county fair.
Maybe it's building a herd your children will someday be proud to call theirs.

Whatever your arena, CHASE IT.

Bet on the genetics.
Trust your eye.
Make the mating.
Put in the work.
Take the risk.

Because no matter what we've accomplished, we still believe the best one is one we haven't even raised yet.

WELCOME TO THE NIGHT OF CHAMPIONS.

ARENA

Brahman Ranch of Champions

You're always welcome here.

This sale is governed by Texas law. These terms represent the full agreement between buyer and B.R. Cutrer, Inc. Updates posted at dvauction.com or www.brcranch.com take precedence over catalog.

PAYMENT AND TRANSFER Terms of the sale are cash, check, or bank wire due upon receipt, and before animals leave BRC. Payment for the cattle is due on or before October 24, 2026. Unpaid accounts are billed 18% APR beginning seven (7) days following sale. Upon receipt of payment, B.R. Cutrer, Inc. will transfer registration paper to the buyer. If full payment is not received within 7 (seven) days, then upon written or electronic notice to buyer, BRC shall retain ownership of animal with full property rights, including the ability to sell the animal to another buyer. Animals not paid for within 7 days of the sale forfeit any future guarantees.

FEEDING AND CARE Cattle will be provided free care until October 31, 2026, after which feed is billed at \$8/head/day in the BRC development facility and \$20/head/day at the show barn. Any veterinary expense will be the owners obligation. Feed charges must be paid in full before cattle leave BRC. Cattle left at the ranch must carry livestock insurance.

LIABILITY & INSURANCE Ownership of the animal transfers at the time of sale and buyer bears the risk of injury, disease or death which may occur. Insurance is available through Jensen Livestock Agency, 785-262-1116.

HEALTH Cattle are eligible for a state approved health certificate for interstate shipment. Animals have been provided the utmost care, nutrition and vaccinations under the guidance of Wharton Veterinary Clinic. Animals are deemed sound and healthy at the time of sale.

GUARANTEE The sale offering is guaranteed to be reproductively sound. This guarantee does not cover injury or death and is not a lifetime guarantee. In the event of a problem, the buyer is responsible to return the animal to BRC and if it does not respond as a satisfactory breeder, we have the option to select a suitable replacement, if available, or take a sale credit. No cash refunds are given. This guarantee does not include injury, death, management, calving issues, feed or nutrition issues. Breeding guarantee is voided if any of the following occur: natural disaster, gross negligence or misconduct, cattle not in suitable body condition, cattle exhibited at livestock shows, virgin heifers flushed or IVF'd prior to having a natural calf, or virgin bulls collected for semen prior to natural breeding. There are no guarantees offered on internationally-exported cattle once they leave the care of BRC. There are no guarantees on embryo conception or pregnancy rate.

LIMITATIONS OF GUARANTEE

We make no further guarantees, including but not limited to ability of cattle to compete in livestock shows, ability to be halter broken, disposition, number of years in production, or number of embryos produced, or number of units of semen produced. BRC retains ownership of all DNA cell lines.

HALF INTEREST LOTS Terms of half interest lots are available at <https://brcranch.com/partnership-bull-faqs>. A separate partnership agreement will be signed upon purchase. Please contact Rachel Cutrer at 979-218-4157 or rachel@brcranch.com for inquiries.
